

Collaborative Quality Systems

TMS

Single User Demo

Installation Instructions

The *TMS™* Demo installation routine has two options:

1. For users with Microsoft Access 2000 or newer already installed on their PC use the TMSDEMO.zip .
2. For users without Microsoft Access installed or with a version older than 2003, the second option includes the installation of a licensed version of runtime Microsoft Access 2003. In this case, on the users' PC install TMSDEMOrt.zip for the demo version.

The *TMS™* icon will appear in your list of programs (Start – All Programs) as “*TMS™*”. The installation program also adds this icon to your desktop as a convenience to you.

It is strongly recommended that users who are unfamiliar with the use of Microsoft Access refer to **TMS Manual** for a clearer understanding of the navigation bar at the bottom left of the data entry screens.

Installation

Downloaded software zip file named TMSDEMO.zip or TMSDEMOrt.zip as explained above. The application registration key is provided in an email message sent to the purchaser's email address.

User Application Installation

On the user's PC open the zip and double click on setup.exe. This will run the TMS Demo installation routine and add the application icon to the user's desktop as well as in their program list.

The application will open directly to the "Registration" screen. Complete the registration information when requested. The Product Key is provided in an email send to the purchaser's email.
